

ETHERNET SERVICES

- » Reliable, end-to-end fiber-based solution
- » Flexible bandwidth options
- » Scalable to fit your growing connectivity needs
- » Transparent LAN service across multiple locations

ETHERNET SERVICES

Converged IP data and video. Data recovery. Business continuity. Off-site storage network. Fibertech's ethernet service allows you to transfer the benefits of your LAN across a scalable, secure WAN. At Fibertech, our Ethernet services provide the speed, scalability and flexibility you need to manage your business more efficiently and effectively.

THE FIBERTECH SOLUTION

As your bandwidth requirements grow, you need the communications and IT infrastructure to support it. Using standard LAN interfaces, Fibertech offers an affordable way to connect your business locations via Ethernet with the speed you need—from 3 Mbps to 1 Gbps. Ethernet can be used to support applications such as LAN-to-LAN connectivity, storage area networking, Internet access and business continuity solutions.

Connection

Ethernet handoff via fiber optics with a 100 Base Tx interface over category 5 twisted pair cable. Gigabit Ethernet provided via 1000BaseT, 1000Base5x, or 1000BaseLX.

Features

- › Connectivity via fiber optics
- › Point-to-point or dedicated ring configurations
- › Transparent packet transmission between locations supporting jumbo frames, VLAN tagging and VLAN stacking
- › 24x7x365 monitoring and customer care
- › Maximum flexibility and control of your network
- › Reduced costs through efficient data transport options via fiber
- › Solid service level agreements
- › Fast provisioning time frames

THE FIBERTECH BENEFITS

CONTROL

Direct fiber connections between your business locations are carried end-to-end via our Fibertech network. That means you drive the network—not the other way around.

FLEXIBILITY

Scalable, on-demand bandwidth means as your business grows, so does your bandwidth.

EFFICIENCY

3 Mbps to 1 Gbps connections with the ability to size up or down as needed makes your whole IT system work smarter.

THE FIBERTECH ADVANTAGE

All Fibertech business solutions are delivered on end-to-end fiber optics that seamlessly connect all of your business locations. These directly routed services mean greater availability and flexibility compared to other legacy carriers. What's more, we own our entire 20-market network footprint, so you're assured faster provisioning times and best-in-class implementation processes that are truly in sync with your needs.

THE FIBERTECH DIFFERENCE

Fibertech is committed to providing a customer experience like no other. In addition to our well-earned reputation for service dependability and flexible solutions, we're dedicated to customer responsiveness and providing a first-class approach to customer service. And we have the customer success stories to prove it.

At the heart of our customer service approach is the Technical Assistance response team and Network Operations Center (NOC). This group of seasoned network engineers is available to answer your technical questions, assist in troubleshooting issues, engineer new applications and direct field engineers to your facility for on-site technical assistance. They're not just our team, they're your team. They understand transmission technology, as well as how to deliver it in a way that makes the most sense for you.
